Project Design Phase-I
Solution Architecture

Date	8 October 2022
Team ID	PNT2022TMID40831
Project Name	Project – Exploratory Analysis Of Rainfall Data In India For Agriculture
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is responsible for defining and communicating a shared technical and architectural vision across a "solution train" to help ensure the system solution under development is fit for its intended purposes goals are to

- Find technology solution to business problem that meets business requirements defined by the customer.

- Describe the gist of the solution:it's structure, and the way it fits with the rest of the business structure and contributes to the workflow.

- Define solution requirements key features of the solution and phases of the implementation.

- Provide specifications for solutions management and delivery.

- Analyse the impact of the solution on the business goals and direct outcomes of solution implementation.
